

DevOps Engineer – Hogrefe Test System (x/f/m)

Hogrefe Publishing Group

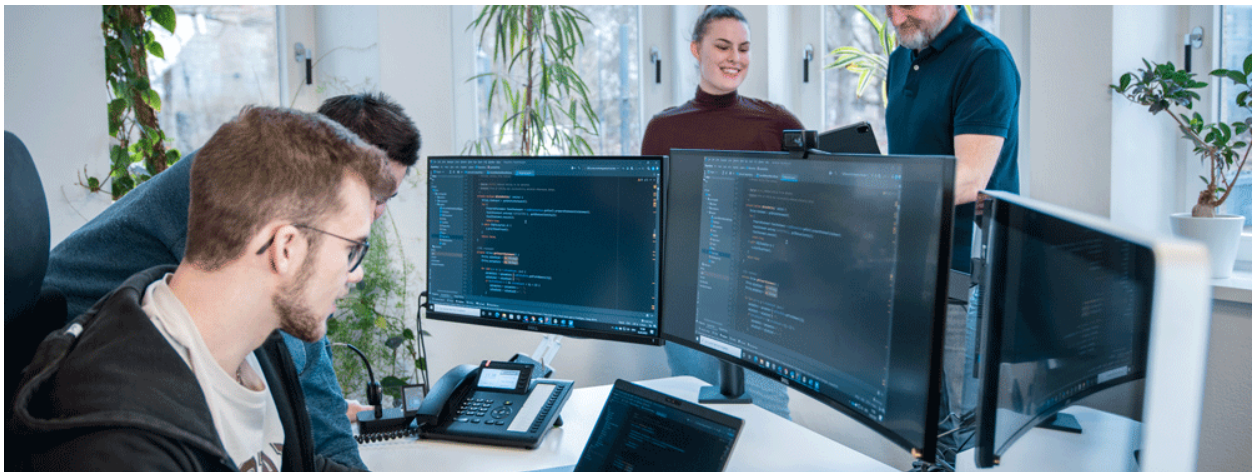

Göttingen/remote

Permanent contract

Flexible working hours, 30-40 h/week

Hogrefe, with psychology at its core, identifies, develops, and disseminates knowledge about human experience. We create and publish scientifically based printed and electronic assessments, books, and journals focused on psychology and psychiatry. We are the largest company in our field in Europe and employ over 450 people world-wide.

Our E-Assessment department develops the Hogrefe Test System (HTS), a web platform for comprehensive psychological online assessments. We are more than 40 people including Software Engineers, Psychologists, Product Managers, Quality Assurance, and UX Designers. We develop, learn, and grow together. Each employee in their own way, with their own interests, their own personality, and their own approach. There are many ways to reach your goal. Together, we are making Hogrefe successful.

We are looking for a full-time **DevOps Engineer (x/f/m)** to strengthen our team. You will be one of our main drivers on our road to Continuous Delivery, using your skills and experience to bring developer productivity to the next level. In addition, an innovative team with state-of-the-art development methods welcomes you!

What will you be doing?

- Be a champion of “Developer Experience”, embracing the power of automation while empowering Software Engineers with the tools and guidance to continuously improve productivity
- Unleash your creativity to reduce the release cycle times of our platforms while improving the observability and robustness, relentlessly pushing our platform towards “Continuous Delivery”
- Build elegant, efficient, and reliable technical solutions, showcasing your creativity and problem-solving skills
- Dive deep into troubleshooting, debugging, and deploying software versions on our production systems, contributing to the smooth operation of our software ecosystem
- Create system architectures and software designs, actively shaping the future of our applications
- Coach and mentor colleagues within our company on industry best practices
- Work in a collaborative environment with peer reviews of designs and solutions, actively sharing your knowledge while helping to continuously refine our collective work

Who are you?

- You hold a Bachelor's degree in Computer Science, a related field, or have comparable working experience
- You have at least 3 years of experience working as a Software Engineer or DevOps Engineer
- You are proficient in at least one programming language such as Java, Typescript, or Python
- You have strong knowledge of building CI/CD pipelines with tools such as GitLab or GitHub
- You are familiar with service orchestration and containerization utilizing Kubernetes and Docker
- You care holistically about software products, from development to operational excellence
- You have experience working in an agile software development environment
- You are able to troubleshoot and debug complex software issues and have excellent problem-solving and analytical skills
- You have a strong sense of ownership and are comfortable with ambiguity
- You are a teamplayer and strong communicator, speaking and writing fluent English; German language knowledge is a plus

What will you get?

- Work flexibility – Work remotely or in our beautiful office
- Work-life balance – Decide for yourself how many hours per week you want to work (30-40 hours)

- Agile methods – We work iteratively and value feedback
- Qualification – We promote on-the-job training and recognized certifications
- Team spirit – Team events and celebrations bring variety to your workspace
- Health management – Hogrefe Bikes, team sports and health days, fruit and relaxation
- Money and more – In addition to your salary, we motivate you with a special annual payment, pension allowances and capital-forming benefits

We are looking forward to your application!
