

Instructions to Authors

Social Psychology

Social Psychology is a publication dedicated to international research in social psychology as well as a forum for scientific discussion and debate. The sole publishing language is English, and there are 6 issues per year.

Aims and Scope

Social Psychology publishes innovative and methodologically sound research and serves as an international forum for scientific discussion and debate in the field of social psychology. Topics include all basic social psychological research themes, methodological advances in social psychology, as well as research in applied fields of social psychology. The journal focuses on original empirical contributions to social psychological research, but is open to theoretical articles, critical reviews, and replications of published research.

The journal welcomes original empirical and theoretical contributions to basic research in social psychology, to social psychological methods, as well as contributions covering research in applied fields of social psychology, such as economics, marketing, politics, law, sports, the environment, the community, or health. Preference will be given to original empirical and experimental manuscripts, but theoretical contributions, critical reviews, and replications of published research are welcome as well.

Experience and Innovation

The journal was published until volume 38 (2007) as the *Zeitschrift für Sozialpsychologie* (ISSN 0044-3514). Drawing on over 30 years of experience and tradition in publishing high-quality, innovative science as the *Zeitschrift für Sozialpsychologie*, *Social Psychology* has an internationally renowned team of editors and consulting editors from all areas of basic and applied social psychology, thus ensuring that the highest international standards are maintained.

Transparency, Openness, and Replicability

Social Psychology is committed to increasing openness and transparency of the research process. We therefore require authors to

- (a) report sample size and power considerations,
- (b) report effect sizes and confidence intervals for these effect sizes,
- (c) to share their data (upon acceptance),
- (d) to share their materials (upon acceptance)
- (e) to share their analytic code producing the reported findings (upon acceptance)

In addition, we encourage authors to preregister experiments with their analysis plans. Authors will report whether they preregistered their studies and, if they did, to provide the respective URL in the manuscript. We also encourage authors to include the 21-word statement by Simmons, Nelson, and Simonsohn (2011) for empirical studies:

“We report how we determined our sample size, all data exclusions (if any), all manipulations, and all measures in the study.”

Publication Ethics

It is important to the Hogrefe Publishing Group that our scientific journals and all the people involved adhere to the highest ethical standards. Please take a moment to review [our guidelines](#) on what this means for authors, editors, reviewers, and us as a publisher.

Authors must ensure that all research meets these ethical guidelines and affirm that the research has received permission from a stated Research Ethics Committee (REC) or Institutional Review Board (IRB), including adherence to the legal requirements of the study country.

***Social Psychology* publishes the following types of articles**

Original Articles, Research Reports, and Replications.

Original Articles report empirical and/or theoretical contributions to social psychological research; they should not exceed 8,000 words (including abstract, text, references, notes, appendices, as well as figures and tables).

Research Reports present concise descriptions of innovative empirical findings; they should not exceed 3,500 words (including abstract, text, references, notes, appendices, as well as figures and tables).

Replications offer the opportunity to report successful or failed replications of existing research; they should not exceed 3,500 words (including abstract, text, references, notes, appendices, as well as figures and tables). Please note that electronic supplementary material (ESM) is not included in the word count.

Rapid Turnaround

Social Psychology offers a rapid and transparent peer-review process and a short time-lag between acceptance of papers and publication. The time between manuscript submission and editorial decision is usually less than 8 weeks. Mean time from submission to first decision (2019): 60 days.

Manuscript Submission

All manuscripts should be submitted online at <http://www.editorialmanager.com/sopsy>, including electronic supplementary material (ESM). Please follow the online instructions for submission. Should you have any technical queries regarding this process, please contact Juliane Munson, Hogrefe Publishing (E-mail production@hogrefe.com).

Please direct any editorial questions to the editorial office:

E-mail SocialPsych.EditorialOffice@gmail.com

Manuscript format and style

Blind reviewing is mandatory

Authors should therefore remove all potentially identifying information from the manuscript, replacing names and any indication of the university where a study was conducted by neutral placeholders.

Title page

To facilitate blind reviewing, the **Title Page** of the submitted manuscript should include only the paper's title and running head. A second title page including all author information should be submitted as a separate document. This should include the title, author name(s) (preceded by first names, but with no academic titles given); name of institute (if there is more than one author or institution, affiliations should be indicated, using superscript Arabic numerals); and an address for correspondence (including the name of the corresponding author and e-mail address).

Author contribution

We encourage the inclusion of a section headed **Authorship** which outlines the contributions of the individual authors to the paper using relevant CrediT roles, formatted as in the following example with author order as on the article:

Philipp Yang, conceptualization, methodology; Ina Smith, funding acquisition;
Sun Cheung, writing – review & editing.

Please refer to <https://credit.niso.org/> for the contributor roles.

Abstract

An **Abstract** (maximum length 120 words) should be printed on a separate sheet for original papers, reviews, and reports. A maximum of 5 keywords should be given after the abstract. Reference Citations in the text and in the reference list proper should follow conventions listed in the *Publication Manual of the American Psychological Association*, 7th ed. (APA Manual).

Tables and Figures

Tables should be numbered using Arabic numerals. Tables must be cited in the text (e.g., “As shown in Table 1, . . .”). Each table should be printed on a separate sheet. Below the table number, a brief descriptive title should be given; this should then be followed by the body of the table. It is recommended that each table should also include a brief explanatory legend.

Figures should be numbered using Arabic numerals. Each figure must be cited in the text (e.g., “As illustrated in Figure 1, . . .”) and should be accompanied by a legend on a separate sheet. As online submission requires papers to be submitted as one file, figures and tables etc should be embedded or appended to the paper and not be sent as separate files. However, upon acceptance of an article, it may be necessary for figures to be supplied separately in a

form suitable for better reproduction: preferably high-resolution (300 dpi) or vector graphics files. Where this is necessary, the corresponding author will be notified by the publishers.

Note that an allowance for any tables and figures should be deducted from the above depending on their size (approximately 200 words per quarter print page).

Scientific nomenclature and style

Authors should follow the guidelines of the APA Manual (7th ed.) regarding style and nomenclature. Authors should avoid using masculine generic forms in their manuscripts. General statements about groups of people should be written in gender-neutral form (see APA Manual); when presenting examples, authors may alternate between female and male forms throughout their text. In the reference list make sure to provide the DOIs (Digital Object Identifier) of the cited journal articles.

Language

It is recommended that authors who are not native speakers of English have their papers checked and corrected by a native-speaker colleague before submission. Standard US American spelling and punctuation as given in *Webster's New Collegiate Dictionary* should be followed.

Open Data and Electronic Supplementary Material (ESM)

Authors may submit study data, analysis scripts, and other study materials for manuscripts that involve new data as Electronic Supplementary Materials (ESM). In general, ESM may be files that were used to carry out the research (such as datasets) or additional items that are not essential for inclusion in the full text but would nevertheless benefit the reader. Being electronic, ESM can also include items that cannot, at this time, be produced in print form. ESM will be published online as received from the author(s) without any conversion, testing, or reformatting. They will not be checked for typographical errors or functionality. The responsibility for the content and functionality remains entirely with the author(s).

Hogrefe Publishing does not provide technical support for the creation or viewing of the supplementary files. If necessary, authors should seek the assistance of their local IT department. Like the manuscript, ESM should be original and not previously published. If previously published, it must be submitted with the necessary permissions. Note that the ESM files, just like the article itself, are permanent records and may not be altered once they have been published online.

Please ensure that any ESM submitted with the article is in compliance with the EU General Data Protection Regulation (GDPR).

Submission of ESM

ESM files will be subjected to peer review along with the article itself. The number of ESM files you submit should be limited to 10. The file size should be kept as small as possible, not

exceeding 10 MB in total. All file formats are accepted with the exception of executable files (e.g., .exe, .com, or .msi). Commonly used file formats that are accessible by most readers are preferred. Following the online instructions, submit the ESM files in a single zip file separate from the other files that are part of your submission.

Citation in manuscript

All ESM files must be referred to with in-text citations (as for tables, figures, and appendices) and should be numbered in the order in which they are cited in the text. Follow the example:

For more information, listen to the audio file in Electronic Supplementary Material 1.

or: (listen to the audio file in Electronic Supplementary Material 1)

or: (the audio file is provided in Electronic Supplementary Material 1)

If appropriate, you may combine several ESM elements into a single file. For example:

See Tables 1–3 in Electronic Supplementary Material 1.

Include a section headed “Electronic Supplementary Material” at the end of your article before the reference section. List all files in the order in which they are cited in the text. Provide a title for each ESM file along with the file name. Optionally, you may also provide a short description for each file (max. 20 words). Follow the example:

ESM 1. Audio file (.mp3). (= title and file name)

This audio file contains utterances of the study participants. (= description of file)

ESM 1. Tables 1–3 (.xlsx). (= title and file name)

The tables show additional *p*-values, weather variables, and demographic characteristics.

(= description of file)

Make sure that the file names listed here match the names of the submitted files. Please note that only the title and the description will appear in the article; the file name will not. It is for reference purposes only.

Proofs

PDF proofs will be sent to the corresponding author. Changes of content or stylistic changes may only be made in exceptional cases in the proofs. Corrections that exceed 5% of the typesetting costs may be invoiced to the authors.

Offprints

The corresponding author of each published article will receive free online access to the published version of record when the article is first released online. The author may download the PDF of the published version of record. It is provided for the author's personal use, including for sharing with coauthors (see also "Guidelines on sharing and use of articles in Hogrefe journals" on the journal's web page at www.hgf.io/sopsy).

Copyright agreement

By submitting an article, the author confirms and guarantees on behalf of themselves and any co-authors that the manuscript has not been submitted or published elsewhere, and that they hold all copyright in and titles to the submitted contribution, including any figures, photographs, line drawings, plans, maps, sketches, and tables, and that the article and its contents do not infringe in any way on the rights of third parties. The author indemnifies and holds harmless the publisher from any third-party claims.

The author agrees, upon acceptance of the article for publication, to transfer to the publisher the exclusive right to reproduce and distribute the article and its contents, both physically and in nonphysical, electronic, or other form, in the journal to which it has been submitted and in other independent publications, with no limitations on the number of copies or on the form or the extent of distribution. These rights are transferred for the duration of copyright as defined by international law. Furthermore, the author transfers to the publisher the following exclusive rights to the article and its contents:

1. The rights to produce advance copies, reprints, or offprints of the article, in full or in part, to undertake or allow translations into other languages, to distribute other forms or modified versions of the article, and to produce and distribute summaries or abstracts.
2. The rights to microfilm and microfiche editions or similar, to the use of the article and its contents in videotext, teletext, and similar systems, to recordings or reproduction using other media, digital or analog, including electronic, magnetic, and optical media, and in multimedia form, as well as for public broadcasting in radio, television, or other forms of broadcast.
3. The rights to store the article and its content in machine-readable or electronic form on all media (such as computer disks, compact disks, magnetic tape), to store the article and its contents in online databases belonging to the publisher or third parties for viewing or downloading by third parties, and to present or reproduce the article or its contents on visual display screens, monitors, and similar devices, either directly or via data transmission.
4. The rights to reproduce and distribute the article and its contents by all other means, including photo-mechanical and similar processes (such as photocopying or facsimile), and as part of so-called document delivery services.

5. The right to transfer any or all rights mentioned in this agreement, as well as rights retained by the relevant copyright clearing centers, including royalty rights to third parties.

Online rights for journal articles

Guidelines on authors' rights to archive electronic versions of their manuscripts online are given in the document "Guidelines on sharing and use of articles in Hogrefe journals" on the journal's web page at www.hgf.io/sopsy.
