

Request to use test(s) for COVID-19 research

Thank you for your interest in using Hogrefe assessments as part of your research project involving the effects of the COVID-19 health crisis. In return for free assessments, we do require participants in your study to complete a short confidential demographic questionnaire. This way we can learn more about our assessments and improve our norms, as you complete your research. For this purpose, all data will be used aggregated across studies by the Hogrefe team and all identifying information will be anonymized. The Hogrefe demographic questionnaire asks for age, geographical location, educational background and work history/current industry. It also contains questions concerning quarantine requirements (e.g. sheltering in place with family or alone; working

from home or being furloughed, etc.) and feelings about their circumstances (e.g. feeling anxious or depressed). You are of course free to use this questionnaire for your own research.

By signing this form and sending it to covid19research@hogrefe.com for consideration, you agree your participants will complete the Hogrefe questionnaire as outlined above, and that you will obtain their consent.

Please ensure to fill in all the fields marked as required (*). Only fully completed research applications will be processed.

Contact details of primary investigator

Name*
Academic title
University / Institution*
Address*
E-Mail*
Phone
Research program* (BSc, MSc, PhD, other)

Contact details of supervisor
