Emotional Processing Scale – Wellbeing  
Technical Report

Sasha Example  
ID 22936-50  
Date 30/01/2023

# Overview

## Summary profile

Percentile

## Structure of this report

- **Profile sheet**
- **Table of scores**
- **Scale details**
- **Response statistics**

Only qualified psychologists or appropriately trained test users should interpret psychometric test results. Please follow the relevant guidelines from the appropriate professional body.

# Profile sheet

## Emotional Processing Scale – Wellbeing UK Working Population (2022) · Percentile

### Subscales

- Accepting Emotions**  
 The acceptance of emotions, even difficult ones.
- Expressing Emotions**  
 The ability to be comfortable expressing emotions.
- Signs of Unprocessed Emotion**  
 The emotional or behavioural signs which indicate how successfully we have processed important emotional events.
- Controllability of Emotion**  
 The amount of control we feel we have over our emotions.
- Facing Emotions**  
 The facing or avoiding of emotional events.
- Vibrancy of Emotions**  
 The degree to which we feel alive and aware of our emotional feelings.
- Clarity of Connections**  
 The degree to which we are clear about the connections in our emotional life.

### Total

**Emotional Processing Score**  
 A total score combining all 25 items on the scale. It reflects all of the dimensions measured.

Raw value	3.8
Normed value	49
Missing values	0

A total score combining all 25 items on the scale. It reflects all of the dimensions measured.

# Response statistics

## Distribution of responses

## Page focus events

Sorry, page focus information is not available. It could be that the test was completed on paper or before HTS began recording page focus events.

Page focus events occur when a test taker switches away from the test to another window on the computer. For a detailed explanation, please consult the Hogrefe Testsystem Glossary.
