

## SEDAL

### Scale for the for the assessment of the Social-Emotional Developmental Age Level

#### Introduction

The SEDAL is an instrument through which social-emotional development level can be measured in children and adults with a developmental age of 0 to 14 years. The structure of the SEDAL is formed by a division into two domains: Social Development and Emotional Development.

#### Client information

<b>Name:</b>	Test
<b>Sex:</b>	female
<b>Age:</b>	10 years and 9 months
<b>Date of birth:</b>	1-1-2004
<b>Date of assessment:</b>	10-10-2014

#### 1. Analysis at the domain level

In the tables below the developmental age is shown for the two domains of the SEDAL: Social Development and Emotional Development. The *SEDAL Developmental age* is the average developmental age of both domains. The second table shows how the developmental ages are determined based on the percentage of characteristic items for each age category.

Developmental ages SEDAL	
Social Development Domain	10 years
Emotional Development Domain	12 years
<b>SEDAL Developmental age *</b>	<b>11 years</b>

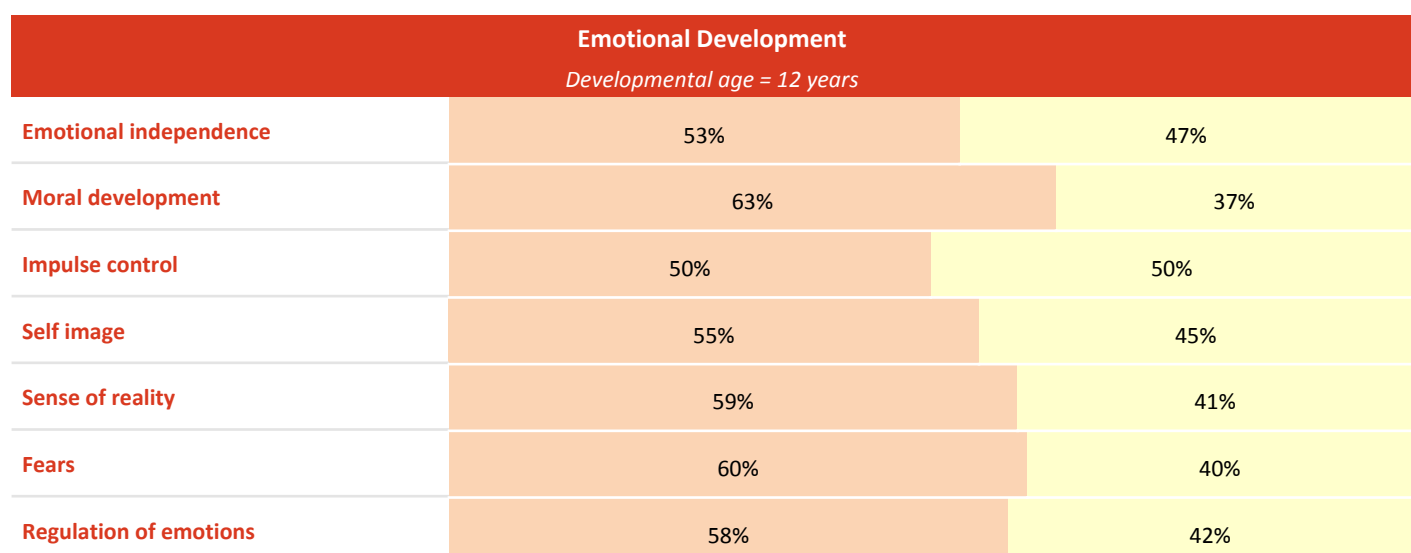

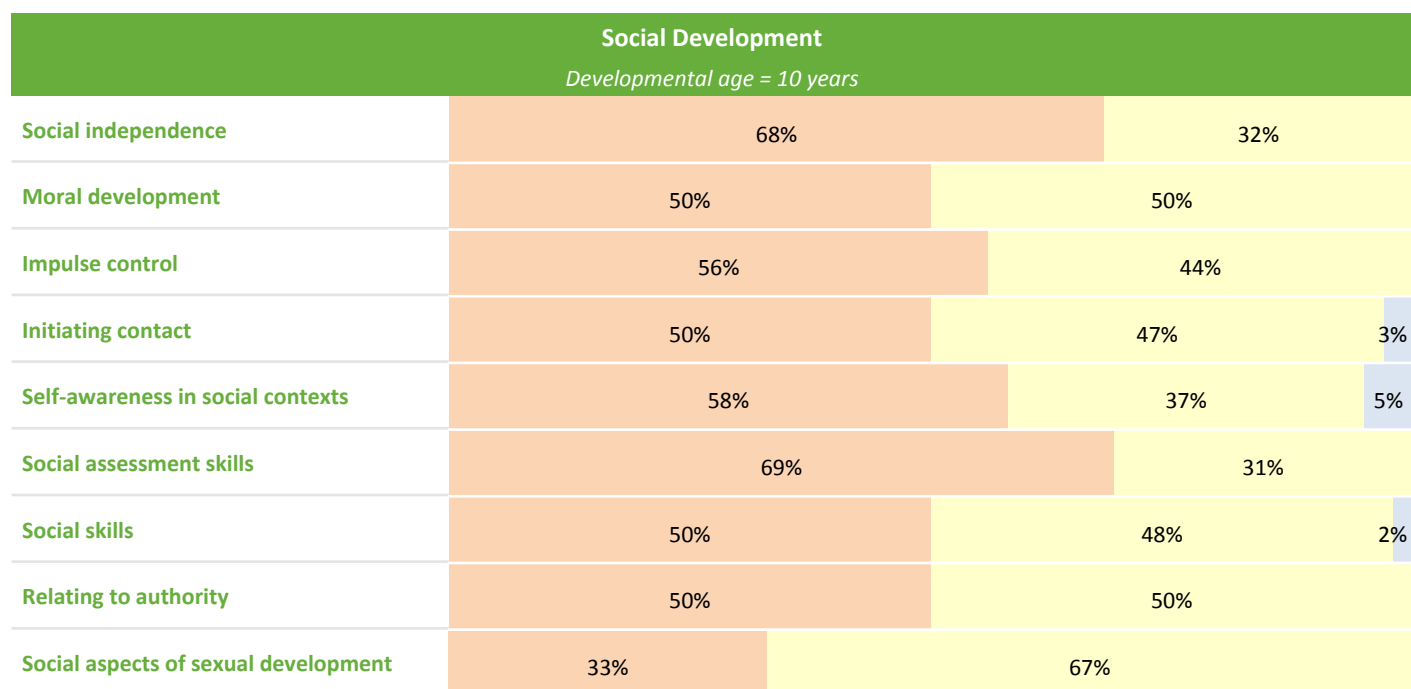

\* 90% confidence interval  $\pm 1.3$  years

Developmental age	Social Development	Emotional Development
0 months - 6 months	60%	100%
6 months - 12 months	83%	67%
12 months - 18 months	100%	0%

9 years - 10 years	50%	100%
10 years - 12 years	0%	50%
12 years - 14 years	40%	0%

## 2. Analysis at the dimension level

In the graphics below is shown the extent to which the client behavior fits with the developmental age of the associated domain. To each dimension applies:

- the *left bar* shows the percentage of items in which the client is lagging behind in development with respect to the developmental age of that particular domain
- the *middle bar* shows the percentage of items which is appropriate for the developmental age of that particular domain
- the *right bar* shows the percentage of items in which the client is ahead in development with respect to the developmental age of that particular domain

### 3. Analysis at the item level: Social Development

In the tables below are shown the (short) items of the Social Development domain, grouped by dimension. For each item you can see if the description is characteristic for the client behavior in the last three months and how this fits with the developmental age of the Social Development domain.

Social independence				
Developmental age = 10 years				
Developmental age	Upper age limit	Item (short display)	Characteristic?	Behaviour appropriate?
