A compact, evidence-based guide to assessing and treating people with body dysmorphic disorder

This volume provides a user-friendly empirically based guide to the diagnosis, phenomenology, etiology, and treatment of body dysmorphic disorder (BDD). New and seasoned clinicians can learn about the foundations of CBT for BDD as well as the rationale and instructions for modifying the approach to meet the differences in symptoms found in this client group. The book explores techniques for treatment engagement, including adjusting therapeutic style, appropriate utilization of behavioral and cognitive therapy, family involvement, and motivational interviewing techniques. Other issues associated with BDD are also highlighted: poor insight, comorbidity, concerning rates of suicidality, and ambivalence regarding treatment.

The authors outline step-by-step instructions for numerous novel and advanced treatment strategies including perceptual retraining, attentional training, acceptance and commitment approaches, and ways to manage ongoing desire for cosmetic surgery. Detailed case examples are presented with corresponding treatment guidelines to highlight the variety in clinical presentation and corresponding treatment approaches. Printable tools in the appendices can be used in daily practice.

Advances in Psychotherapy – Evidence-Based Practice, vol. 44

Contents

1 Description

- 1.1 Terminology
- 1.2 History
- 1.3 Obsessive-Compulsive and Related Disorders
- 1.4 Definition
 - 1.4.1 Specifiers
 - 1.4.2 Insight
- 1.5 Normal Concerns Versus BDD
- 1.6 Symptomatology
- 1.7 Epidemiology
- 1.8 Gender Differences
- 1.9 Onset, Course, and Prognosis
- 1.10 Functional Impairment
- 1.11 Suicidality
- 1.12 Quality of Life
- 1.13 Comorbidity and Differential Diagnosis
 - 1.13.1 Depression
 - 1.13.2 Social Anxiety
 - 1.13.3 Obsessive-Compulsive Disorder
 - 1.13.4 Personality Disorders
 - 1.13.5 Anorexia Nervosa
 - 1.13.6 Excoriation Disorder (Skin Picking)
 - 1.13.7 Olfactory Reference Syndrome
- 1.14 Teasing and Bullying
- 1.15 History of Abuse
- 1.16 Diagnostic Procedures and Documentation
 - 1.16.1 Diagnostic Interviews
 - 1.16.2 Symptom Severity Measures
 - 1.16.3 Insight Measures
- 1.17 Summary

2 Theories and Models

- 2.1 Biological Theories
 - 2.1.1 Neurochemical Theories

- 2.1.2 Neuroanatomical Theories
- 2.1.3 Neuropsychological Models
- 2.2 Psychological Theories
 - 2.2.1 Evolutionary Theory
 - 2.2.2 Learning Theory
 - 2.2.3 Cognitive Behavior Model Based on Social Learning
 - 2.2.4 The Self as an Aesthetic Object
- 2.3 Summary

3 Diagnosis and Treatment Indications

- 3.1 Therapist Variables in Initial Sessions
- 3.2 Diagnostic Assessment
 - 3.2.1 Connection Between Preoccupation and Compulsive and Avoidance Behaviors
 - 3.2.2 Typical Day
- 3.3 Factors That Influence Treatment
 - 3.3.1 Overvalued Ideation
 - 3.3.2 Demographic Variables
 - 3.3.3 Comorbidity
 - 3.3.4 Previous Treatment Experience
- 3.4 Addressing Need for Cosmetic Surgery
- 3.5 Establishing Treatment Goals
- 3.6 Identifying the Appropriate Treatment
 - 3.6.1 Medication for BDD
 - 3.6.2 Cognitive Behavior Therapy for BDD
- 3.7 Summary

4 Treatment

- 4.1 Methods of Treatment
 - 4.1.1 Assessment
 - 4.1.2 Psychoeducation
 - 4.1.3 Treatment Orientation and Engagement
 - 4.1.4 Cognitive Therapy

- 4.1.5 Exposure and Response Prevention
- 4.1.6 Perceptual Retraining
- 4.2 Mechanisms of Action
- 4.3 Efficacy and Prognosis
- 4.4 Variations and Combinations of Methods
 - 4.4.1 Attentional Training Technique and Task Concentration
 - 4.4.2 Cognitive Remediation
 - 4.4.3 Third Wave Therapies
 - 4.4.4 Addressing Trauma and Loss
 - 4.4.5 Addressing Skin Picking and Hair Pulling
 - 4.4.6 Self-Surgery
 - 4.4.7 Addressing Poor Quality of Life
 - 4.4.8 Maintenance and Relapse Prevention
- 4.5 Problems Carrying Out the Treatments
 - 4.5.1 Addressing Desire for Cosmetic Surgery
 - 4.5.2 Addressing Suicidality
 - 4.5.3 Nonadherence to Treatment
 - 4.5.4 Family Involvement and Accommodation
- 4.6 Multicultural Issues in Treatment
- 4.7 Summary

5 Case Vignettes

- 5.1 Case Vignette 1: Post Accident Preoccupation With Nose
- 5.2 Case Vignette 2: Preoccupation With Facial Shape and Muscle Dysmorphia
- 5.3 Case Vignette 3: Preoccupation With Skin Accompanied by Skin Picking

8 Appendix: Tools and Resources

The authors

Sony Khemlani-Patel, PhD, is a licensed psychologist with over 20 years of experience in the treatment of obsessive-compulsive related disorders. She is clinical director of the Bio Behavioral Institute in Great Neck, NY, and on the scientific and clinical

advisory board of the International Obsessive Compulsive Disorder Foundation. She has presented and published extensively in the areas of body dysmorphic and obsessive-compulsive related disorders and has coauthored two self-help books.

Fugen Neziroglu, PhD, ABPP, ABBP, is a board-certified behavior and cognitive psychologist and leading researcher in obsessive-compulsive related disorders. She is the cofounder and executive director of the Bio Behavioral Institute in Great Neck, NY, as well as clinical assistant

professor at the school of Medicine at Hofstra/Northwell. She is on the scientific and clinical advisory board of the International Obsessive Compulsive Disorder Foundation and of the Anxiety and Depression Association of America, and president of OCD New York.

A showcase of how the web can be used to advance psychological knowledge

Web-based research methodology has evolved since the development of the world wide web in the 1990s and has proliferated and diversified with layers upon layers of new major developments in internet technology and life generally (e.g., search engines, social media, smartphones, Open Science). This volume presents a selection of state-of-the-art contributions on web-based research in psychology. Expert authors explore research methodology, including new methods made possible through the web or research that cannot be done without the web. In addition, research ethics, which

have special characteristics in the online research environment, are addressed to varying degrees, including deception and inclusivity. Further topics presented range from how web-based research can advance our knowledge on perception to the adoption of Open Science (including sharing data, materials, and preregistrations), as well as how behavior is observed in web-based research. This collection of contributions is a showcase of the creativity of researchers to find nifty new ways to harness the web to advance psychological research.

The joys and pains of using big data and research synthesis methods in the field of psychology

This sixth collection of “Hotspots in Psychology” goes beyond presenting state-of-the-art systematic reviews and meta-analyses in research fields to also discuss the fruitfulness and challenges of using big data in psychological research. For instance, topics such as intensive longitudinal data (e.g., time series and experience sampling), nonobtrusive methods of data gathering (e.g., sensors and log data), and how big data can be handled and analyzed.

Five contributions explore the application of individual participants meta-analyses as a way to replicate studies, the role of the degree of anthropomorphism (“humanlikeness”) in human–robot interactions, the challenge of multiple dependent effect sizes when conducting a meta-analytical structural equation model, the value of using log data from online platforms as a way to predict learning outcomes, and the utility of a blockwise fit evaluation in structural equation models with many longitudinally measured variables. To promote open science, supplemental material is available in a repository.

A state-of-the-art guide to the assessment of Dark Triad and related personality traits

We encounter people who possess socially undesirable personality traits at subclinical levels in our day-to-day lives, whether it is the boss who acts like a jerk, a cheating partner, or a friend who rubs everyone the wrong way. This volume explores the latest research on the assessment of dark personality traits, including the Dark Triad of narcissism, Machiavellianism, and psychopathy. The internationally renowned contributors provide a comprehensive, evidence-based overview of the personality traits currently being explored.

Each chapter reviews two main topics. First, a particular measure used to study such traits is discussed. This section is geared to helping the reader understand how researchers in this area capture data

on these traits and best decide which instrument they want to use and when. Second, each chapter then details what the psychometric data on the test reveals about human nature, including topics such as sex differences, workplace behaviors, sexuality, and value systems. In this way, the contributors highlight how the convergence of research from various measures can provide a broad mosaic of information about people colloquially called psychopaths, narcissists, spiteful, Machiavellian, and sadists.

This book is essential reading for anyone interested in test development and practitioners interested in the dark side of personality.

Advance Book Information

Peter Karl Jonason (ed.)

Shining Light on the Dark Side of Personality

Measurement Properties and Theoretical Advances

Contents (preliminary)

Part I Introduction

Chapter 1

Introduction by *Peter Karl Jonason*

Part II Narcissism

Chapter 2

A Brief Overview of the Pathological Narcissism Inventory by *Aaron L. Pincus*

Chapter 3

The Narcissistic Personality Inventory by *Joshua D. Foster and Jennifer R. Roley*

Chapter 4

Trait and State Measurement of Grandiose and Vulnerable Narcissism by *Michael L. Crowe and Joshua D. Miller*

Chapter 5

The Hypersensitive Narcissism Scale as a Measure of Vulnerable Narcissism by *Marcin Zajenkowski*

Chapter 6

On the Measurement of Narcissistic Admiration and Rivalry by *Michael P. Grosz, Michael Dufner, and Mitja D. Back*

Chapter 7

Agentic Collective Narcissism and Communal Collective Narcissism by *Magdalena Żemajtėl-Piotrowska, Jarostaw P. Piotrowski, and Constantine Sedikides*

Part III Machiavellianism

Chapter 8

The Mach-IV and Its Descendants by *Edit Szabo and Daniel N. Jones*

Chapter 9

The Five Factor Machiavellianism Inventory (FFMI) by *Katherine L. Collison, Joshua D. Miller, and Donald R. Lynam*

Chapter 10

The Two-Dimensional Machiavellianism Scale by *Conal Monaghan and Boris Bizumic*

Chapter 11

Review of the Machiavellian Personality Scale by *Jason J. Dahling, Nandini Mehta, and Megha Sehgal*

Part IV Psychopathy

Chapter 12

The Triarchic Psychopathy Measure (TriPM) by *Virgil Zeigler-Hill*

Chapter 13

The Hare Self-Report Psychopathy Scale – Fourth Edition (SRP-IV) by *Sandeep Roy and Craig S. Neumann*

Chapter 14

The Levenson Self-Report Psychopathy Scale (LSRP) by *Ella M. Dickison and Martin Sellbom*

Chapter 15

The Elemental Psychopathy Assessment by *Jonathan Branchain*

Chapter 16

The Corporate Personality Inventory by *Nathan Brooks and Katarina Fritzon*

Part V Sadism

Chapter 17

The Assessment of Sadistic Personality by *Rachel A. Plouffe, Deanna L. Walker, Laura K. Johnson, Christopher Marcin Kowalski, and Callista A. Forchuk*

Chapter 18

The Short Sadistic Impulse Scale by *Aisling O'Meara and Jason Davies*

Chapter 19

Multifaceted Assessment of Sadistic Tendencies by *Erin E. Buckels*

Part VI The Dark Side

Chapter 20

Assessing the Dark Triad With the Dirty Dozen Measure by *Radostaw Rogoza and Christopher Marcin Kowalski*

Chapter 21

Short Dark Triad (SD3) and Short Dark Tetrad (SD4) by *Daniel N. Jones and Delroy L. Paulhus*

Chapter 22

The Hogan Development Survey by *Michael J. Boudreaux and Ryne A. Sherman*

Chapter 23

The Spitefulness Scale by *Virgil Zeigler-Hill*

Part VII Final Thoughts

Chapter 24

Measuring Personality Traits in Context by *Cameron S. Kay and Gerard Saucier*

Chapter 25

Ending the Sibling Rivalry Among Dark Traits by *Katherine M. Lawson and Richard W. Robins*

Chapter 26

Controversies Surrounding the Dark Triad by *Joshua D. Miller, Brinkley M. Sharpe, and Donald R. Lynam*

Chapter 27

Controversies in Dark Trait Research by *Delroy L. Paulhus*

Chapter 28 Conclusion by *Peter Karl Jonason*

The editor

Peter Karl (PK) Jonason, PhD, is an associate professor at the University of Padua, Italy, and at Cardinal Stefan Wyszyński University, Warsaw, Poland. He is the author of over 180 publications, most of which are on

the measurement and importance of the Dark Triad traits in personality, social, organizational, cyber, and evolutionary psychology. In 2014, he received the Ig Nobel award in psychology for some of his

work in this area. He teaches classes in psychometrics, personality, and evolutionary psychology along with academic writing.

Practical and scientific guidance on psychological interventions for patients with cancer

Psychosocial oncology is a health psychology specialty that focuses on the psychological, behavioral, emotional, and social challenges faced by patients with cancer and their loved ones. Cancer can cause significant distress, and psychosocial interventions are known to be effective for helping patients and families navigate the many issues that can arise at any stage of the cancer continuum. This volume provides psychologists, physicians, social workers, and other health care providers with practical and evidence-based guidance on the delivery of psychological interventions to patients with cancer.

The multidisciplinary team of authors succinctly present the key principles, history, and theoretical models of cancer-related distress. They then move on to explore clinical assessment and interventions in cancer care, in particular psychological and psychiatric treatments, multidisciplinary care management, and complementary supportive interventions. Case vignettes give the reader insight into diagnostic processes and effective treatment planning. Practitioners will find the printable handout and screening tool for clients invaluable in their daily work.

Psychological Approaches to Cancer Care

Advances in Psychotherapy – Evidence-Based Practice, vol. 47

Contents (preliminary)

1 Description

- 1.1 Common Psychiatric Diagnoses in the Context of Cancer
 - 1.1.1 Major Depression
 - 1.1.2 Adjustment Disorder
 - 1.1.3 Anxiety Disorders
- 1.2 Other Psychiatric/Psychological Issues
 - 1.2.1 Severe Mental Illness and Cancer
 - 1.2.2 Distress
 - 1.2.3 Fear of Recurrence
- 1.3 Epidemiology
- 1.4 Course and Prognosis
 - 1.4.1 Vulnerable Periods
 - 1.4.2 Trajectories of Psychological Distress
 - 1.4.3 Posttraumatic Growth
 - 1.4.4 Survivorship
- 1.5 Differential Diagnosis
- 1.6 Comorbidities
- 1.7 Diagnostic Procedures and Documentation
 - 1.7.1 Distress Screening
 - 1.7.2 Symptom Assessment
 - 1.7.3 Depression Assessment
 - 1.7.4 Anxiety Assessment
 - 1.7.5 Quality of Life (QoL)

2 Theories and Models

- 2.1 Biopsychosocial Model of Cancer

- 2.2 Models of Cancer-Related Distress
 - 2.2.1 Cancer-Related Distress as an Adjustment Disorder
 - 2.2.2 Self-Regulatory Model of Illness Behavior
 - 2.2.3 Stressful Life Events and the Impact of Coping Style on Cancer-Related Distress

3 Diagnosis and Treatment Indications

- 3.1 Distress in Cancer
- 3.2 Adjustment Disorders
- 3.3 Major Depressive Disorder
- 3.4 Anxiety Disorders
 - 3.4.1 Generalized Anxiety Disorder
 - 3.4.2 Panic Disorder
- 3.5 Trauma-Related Disorders
 - 3.5.1 Acute Stress Disorder

The authors

Teresa Deshields, PhD, is the director of supportive oncology at Rush University Cancer Center and a professor in the Department of Psychiatry and Behavioral Sciences and the Department of Medicine at Rush University Medical Center. She is a fellow and past president of the American Psychosocial Oncology Society. As a clinical health psychologist her clinical practice is devoted to treating cancer patients and survivors and their family members throughout the cancer continuum – diagnosis, treatment, survivorship, end of life, and bereavement. Her research is focused on issues related to symptom burden and quality of life in cancer patients and survivors.

Jonathan Kaplan, PhD, is an assistant professor in the Departments of Psychiatry and Behavioral Sciences and Internal Medicine at Rush University Medical Center. He is the psychiatrist for the Rush University Cancer Center and a consultation-liaison psychiatrist and internal medicine hospitalist at Rush University Medical Center. He specializes in the psychiatric treatment of medically complex patients including patients with cancer as well as internal medicine for the hospitalized patient. His research interests include psycho-oncology, collaborative care psychiatry, and supportive treatment models for patients with cancer.

Lauren Rynar, PhD, is an assistant professor in the Department of Psychiatry and Behavioral Sciences and a clinician in the supportive oncology program at the Rush University Cancer Center. She specializes in the psychological care of cancer patients, survivors, and caregivers. Her research interests include quality of life, coping styles, cancer-related distress, and models of supportive care delivery among cancer patients.
