The *European Journal of Health Psychology* strives to promote theory and practice in the analysis of psychological approaches to health and disease. The journal publishes high-quality empirical or experimental research, as well as sound practice-oriented articles, current methodological developments, and comprehensive critical reviews of the scientific literature.

***European Journal of Health Psychology* publishes the following types of articles**

Original Articles, Review Articles, Conceptual Articles, Brief Reports, and Commentaries.

Types and Length of Manuscripts

Original Articles. Most of the articles published in the *European Journal of Health Psychology* are Original Articles. Original Articles present new data, new theory, new methods, or any combination of these. The *European Journal of Health Psychology* is interested in publishing sound observational / epidemiological studies, experimental and quasi-experimental studies, and state-of-the-art psychometric research on assessment instruments and methods with a high impact on research in health psychology. However, pure correlational studies without a clear theoretical foundation based on cross-sectional data derived from convenience sampling are seldom accepted.

Original Articles should not exceed 52,000 characters including abstract, text, references, notes, appendices, and figures and tables. It is recommended that observational studies are reported in accordance with “The Strengthening the Reporting of Observational Studies in Epidemiology” (STROBE) Statement. All reports on clinical trials submitted for publication should include a completed Consolidated Standards of Reporting Trials (CONSORT) flow chart. Please refer to the CONSORT statement website at <http://www.consort-statement.org> for more information.

Review Articles concern meta-analytic, systematic or narrative reviews and interpretations of substantive issues in the general domain of Health Psychology. Review Articles should not exceed 80,000 characters including abstract, text, references, notes, appendices, and figures and tables. It is required that authors submitting meta-analyses and systematic reviews follow the appropriate reporting guidelines: Systematic reviews and meta-analyses of randomized trials and other evaluation studies should be reported in accordance with the Preferred Reporting Items for Systematic Reviews and Meta-Analyses (PRISMA), systematic reviews and meta-analyses of observational studies in accordance with meta-analysis of observational studies in epidemiology (MOOSE), e.g., see Stroup et al. (2000)¹. In the interest of academic transparency, authors of meta-analyses and systematic reviews submitted to the *European Journal of Health Psychology* are required to include a PRISMA statement (<https://www.prisma-statement.org/>) as a supplemental file for review (the final document will be included as ESM). In addition, authors of meta-analyses should include the information recommended by the APA’s Meta-Analysis Reporting Methods (MARS), which can be found at <http://www.apastyle.org/manual/related/JARS-MARS.pdf>

Conceptual Articles are intended as a forum for conceptual pieces that initiate new lines of research and theory, or provide a coherent framework for existing theory and programs of research. Conceptual Articles should aim to offer integrative theoretical formulations concerning work in any area of health

¹ Stroup, D.F., Berlin, J.A., Morton, S.C., Olkin, I., Williamson, G.D., Rennie, D., Moher, D. Becker, B.J., Sipe, T.A., & Thacker, S.B. (2000). Meta-analysis of observational studies in epidemiology. A proposal for reporting. Meta-analysis Of Observational Studies in Epidemiology (MOOSE) Group. *Journal of the American Medical Association*, 283(15), 2008-2012. <https://doi.org/10.1001/jama.283.15.2008>

psychology. They should not exceed 70,000 characters including abstract, text, references, notes, appendices, and figures and tables. The total number of characters also includes blank spaces.

Brief Reports present concise but complete accounts of new empirical findings of broad interest. The data presented is based on a strong rationale. Again, correlational studies based on cross-sectional data derived from convenience sampling are unlikely to undergo peer review. Brief reports are limited to 20,000 characters in total including abstract, text, references, notes, appendices, as well as figures and tables. The total number of characters also includes blank spaces.

Commentaries criticize and/or supplement articles previously published in the *European Journal of Health Psychology*. They are limited to 8,000 characters. The total number of characters also includes blank spaces.

Please note that Electronic Supplementary Material (ESM) is not included in the character count.

Manuscript Submission

Manuscripts of Original Articles, Review Articles, Conceptual Articles, and Brief Reports, including Electronic Supplementary Material (ESM), should be submitted online at

<http://www.editorialmanager.com/zgp>

Submit Commentaries and Book Reviews via email to the journal's Editorial Assistant, Lisa-Marie Maukel (E-mail ejhp@uni-trier.de, Tel. +49 651 201-3346).

Only papers that have not previously appeared in or are currently under consideration by another publication can be considered for publication. Please do not submit printed copies of your manuscript. Manuscripts are subject to masked peer review and may be returned to authors for revision. The Editor-in-Chief and the Associate Editors are responsible for the journal's editorial section.

Should you have any editorial/content questions, please contact the Editorial Assistant, Lisa-Marie Maukel (E-mail ejhp@uni-trier.de, Tel. +49 651 201-3346). Please direct any technical queries regarding the submission through Editorial Manager to production@hogrefe.com.

Cover Letter

The authors must include a cover letter with the manuscript submission. The cover letter should concisely summarize the findings of the study, clarify the study's novelty and the importance to the readership of the journal. The cover letter must indicate that the manuscript has not been published previously and that it is not under consideration for publication elsewhere. The relationship of the submitted manuscript to any other published or submitted papers reporting the same or overlapping data needs to be explained. It should be stated that all authors agree with the content of the manuscript.

Manuscript Format

Manuscripts should be prepared according to the *Publication Manual of the American Psychological Association* (7th ed.). Authors should follow the guidelines of the APA Manual regarding style and nomenclature. In particular, statistical and mathematical copy, as well as references and their text citations, should conform to the Publication Manual. In the reference list make sure to provide the DOIs (Digital Object Identifier) of the cited journal articles. It is recommended that authors who are not native speakers of English have their papers checked and corrected by a native-speaker colleague before submission. Standard US American spelling and punctuation as given in *Webster's New*

Collegiate Dictionary should be followed. For further instructions please watch the APA Online Tutorial for Compulsory Reference Style on the journal's web page at <http://www.hgf.io/ejhp>.

To ensure anonymous peer review, remove all potentially identifying information from the manuscript, replacing names and any indication of the university where a study was conducted by neutral placeholders. Only the title page and cover letter may contain personal information.

The **Title Page** of each paper should include, in the following order: title of the article; author name(s) preceded by first names, but without academic titles; name of the institute or clinic (if there is more than one author or institution, affiliations should be indicated using superscript Arabic numerals); an address for correspondence (including the name of the corresponding author); and the author note with acknowledgments, disclosures, and funding sources. A template for the title page is available on the journal's website at <http://www.hgf.io/ejhp>.

For Original Articles, Review Articles, and Brief Reports a structured **Abstract** is required (maximum length 250 words). This should be divided into the sections Background, Aims, Method, Results, Limitations, Conclusion. Conceptual Articles must also include an Abstract, but no structuring. A maximum of 5 keywords should be given after the abstract.

The Methods section of Original Articles and Brief Reports must include an **Ethics Statement** that the research has received permission (or formal review and exemption) from a stated Research Ethics Committee (REC) or Institutional Review Board (IRB). The specific name of the committee or board and/or the approval number/ID should be included. The committee's or board's name should be blinded for review. Please see also the section "Publication Ethics".

Figures and tables should be numbered using Arabic numerals. Each table and figure must be cited in the text and should be accompanied by a legend. Please submit tables and figures via Editorial Manager as separate files. Figures must be supplied in a form suitable for reproduction: preferably high-resolution bitmaps (e.g., tif or jpg, 300 dpi) or as vector graphics files. Figures will normally be reproduced in black and white only. While it is possible to reproduce color illustrations, authors are reminded that they will be invoiced for the extra costs involved.

Important: An allowance for any tables and figures should be included in the totals depending on their size. A typical table or figure takes up a quarter, half, or full page. Each quarter page in the manuscript equals about 200 words per quarter print page.

Publication Ethics

Authors are reminded that the *European Journal of Health Psychology* adheres to the ethics standards of scientific publication described in the "Ethical principles of psychologists and code of conduct" (APA, <https://www.apa.org/ethics/code/index>). The journal generally conforms to the "Uniform Requirements for Manuscripts" of the International Committee of Medical Journal Editors (ICJME, <http://www.icmje.org/recommendations/>). The journal and its editors adhere to, and expect its authors to adhere to, the Committee on Publication Ethics (COPE) standards (<http://publicationethics.org>).

Authors must ensure that all research meets these ethical guidelines and affirm that the research has received permission from a stated Research Ethics Committee (REC) or Institutional Review Board (IRB), including adherence to the legal requirements of the study country.

Open Data and Electronic Supplementary Material (ESM)

Authors may submit study data, analysis scripts, and other study materials for manuscripts that involve new data as Electronic Supplementary Materials (ESM). In general, ESM may include relevant items that cannot be reproduced in printed form and may consist of material used to carry out the research (data sets, participant instructions, audiovisual stimuli, video footage of the experimental setup) or additional items that are not essential for inclusion in the full text but would nevertheless benefit the reader. ESM files will be published online as received from the author(s) without any conversion,

testing, or reformatting. They will not be checked for typographical errors or functionality. The responsibility for the content and functionality remains entirely with the author(s).

Hogrefe Publishing does not provide technical support for the creation or viewing of the supplementary files. If necessary, authors should seek the assistance of their local IT department. Like the manuscript, ESM should be original and not previously published. If previously published, it must be submitted with the necessary permissions. Note that the ESM files, just like the article itself, are permanent records and may not be altered once they have been published online.

Please ensure that any ESM submitted with the article is in compliance with the EU General Data Protection Regulation (GDPR).

Submission of ESM

ESM files will be subjected to peer review along with the article itself. The number of ESM files you submit should be limited to 10. The file size should be kept as small as possible, not exceeding 10 MB in total. All file formats are accepted with the exception of executable files (e.g., .exe, .com, or .msi). Commonly used file formats that are accessible by most readers are preferred. Following the online instructions, submit the ESM files in a single zip file separate from the other files that are part of your submission.

Citation in Manuscript

All ESM files must be referred to with in-text citations (as for tables, figures, and appendices) and should be numbered in the order in which they are cited in the text. Follow the example:

For more information, listen to the audio file in Electronic Supplementary Material 1.
or: (listen to the audio file in Electronic Supplementary Material 1)
or: (the audio file is provided in Electronic Supplementary Material 1)

If appropriate, you may combine several ESM elements into a single file. For example:

See Tables 1–3 in Electronic Supplementary Material 1.

Include a section headed “Electronic Supplementary Material” at the end of your article before the reference section. List all files in the order in which they are cited in the text. Provide a title for each ESM file along with the file name. Optionally, you may also provide a short description for each file (max. 20 words). Follow the example:

ESM 1. Audio file (.mp3). (= title and file name)

This audio file contains utterances of the study participants. (= description of file)

ESM 1. Tables 1–3 (.xlsx). (= title and file name)

The tables show additional *p*-values, weather variables, and demographic characteristics. (= description of file)

Make sure that the file names listed here match the names of the submitted files. Please note that only the title and the description will appear in the article; the file name will not. It is for reference purposes only.

Proofs

PDF proofs will be sent to the corresponding author. Changes of content or stylistic changes may only be made in exceptional cases in the proofs. Corrections that exceed 5% of the typesetting costs may be invoiced to the authors.

Offprints

The corresponding author of each accepted paper will receive free online access to the published version of the paper when it is first released online. The author may download the PDF of the published version of record. It is provided for the author's personal use, including for sharing with coauthors (see also "Guidelines on sharing and use of articles in Hogrefe journals" on the journal's web page at <http://www.hgf.io/ejhp>).

Copyright Agreement

By submitting an article, the author confirms and guarantees on behalf of themselves and any co-authors that the manuscript has not been submitted or published elsewhere, and that they hold all copyright in and titles to the submitted contribution, including any figures, photographs, line drawings, plans, maps, sketches, tables, and electronic supplementary material, and that the article and its contents do not infringe in any way on the rights of third parties. The author indemnifies and holds harmless the publisher from any third-party claims. ESM will be published online as received from the author(s) without any conversion, testing, or reformatting. They will not be checked for typographical errors or functionality.

The author agrees, upon acceptance of the article for publication, to transfer to the publisher the exclusive right to reproduce and distribute the article and its contents, both physically and in nonphysical, electronic, or other form, in the journal to which it has been submitted and in other independent publications, with no limitations on the number of copies or on the form or the extent of distribution. These rights are transferred for the duration of copyright as defined by international law. Furthermore, the author transfers to the publisher the following exclusive rights to the article and its contents:

1. The rights to produce advance copies, reprints, or offprints of the article, in full or in part, to undertake or allow translations into other languages, to distribute other forms or modified versions of the article, and to produce and distribute summaries or abstracts.
2. The rights to microfilm and microfiche editions or similar, to the use of the article and its contents in videotext, teletext, and similar systems, to recordings or reproduction using other media, digital or analog, including electronic, magnetic, and optical media, and in multimedia form, as well as for public broadcasting in radio, television, or other forms of broadcast.
3. The rights to store the article and its content in machine-readable or electronic form on all media (such as computer disks, compact disks, magnetic tape), to store the article and its contents in online databases belonging to the publisher or third parties for viewing or downloading by third parties, and to present or reproduce the article or its contents on visual display screens, monitors, and similar devices, either directly or via data transmission.
4. The rights to reproduce and distribute the article and its contents by all other means, including photo-mechanical and similar processes (such as photocopying or facsimile), and as part of so-called document delivery services.
5. The right to transfer any or all rights mentioned in this agreement, as well as rights retained by the relevant copyright clearing centers, including royalty rights to third parties.

Hogrefe OpenMind

Information about the open access publishing program Hogrefe OpenMind, including the article processing fee and the available Creative Commons licenses, are given at [OpenMind \(hogrefe.com\)](http://OpenMind(hogrefe.com)).

Online Rights for Journal Articles

Guidelines on authors' rights to archive electronic versions of their manuscripts online are given in the document "Online rights for journal articles" on the journal's web page at <http://www.hgf.io/ejhp>.
