IDS-2

Ordering, test administration and digital scoring

Information on ordering options and prices

With the IDS-2 you can map a large number of developmental functions of children and young people: Intelligence and Executive Functions, Psychomotor skills, Social-emotional skills, Scholastic skills and Motivation and Attitude. To get a complete picture of the child you will want to use all six domains and 30 subtests – but you can also choose to adapt your testing according to the client's needs; for this reason we strive to offer flexibility in ordering.

The starter kit
The IDS-2 starter pack contains all the materials you'll need for the complete assessment: two manuals, kit materials, administration booklets and scoring templates. It also contains 5 copies of all consumable items: record forms, response sheets, and booklets, as well as extra online scoring credits*. For some parts of the IDS-2, you'll only need a record form; for other subtests you may also need one or more response sheet or booklet.

Online scoring
After your initial kit order, you'll receive an email from our customer care team containing your login details for our digital platform, HTS. There you can enter your recorded scores to be automatically calculated against the chosen norm groups. You can then view, save and download the corresponding report in HTS. For each physical record form, you will receive an online scoring credit* that corresponds with the domain and age group.

Test administration
The starter pack is quite full of administration booklets, response sheets and record forms, so we have outlined what you would need for testing a child or adolescent based on common testing scenarios. Once you become familiar with the IDS-2 colour coding, the IDS-2 subtests and the various materials involved with administering each subtest you will be able to quickly pull from the materials what is needed, based on the reason for the assessment.

Information in the *IDS-2 Test Administration and Scoring Manual* is also colour-coded to correspond with the rest of the kit materials, and Table 3 lists what is included in the kit while Table 4 outlines which materials are needed for each test. And for all 30 IDS-2 subtests, each kit item needed is listed at the beginning of the administration instructions.

What to order
All consumable materials are available via our website. You can choose from various packages so that you will only receive the items you need. On the pricing overview on the back, you can see which items are available, what exactly you receive, and what the costs are for each.

There are no other costs: with the overview on the back, you have a complete picture of what you need and pay. Do you have any questions or comments? Email us at customersupport@hogrefe.co.uk.

With the starter kit you will receive 5 additional reports for each testing area, so you'll have a good pool of credits for practice or in case of error.
